

ZeroCarbon BatteryManager

The battery is the most valuable component of your electric vehicle. Protecting it is vital for an effective electric fleet.

ZeroCarbon BatteryManager analyses battery usage and health to **help protect battery performance and extend asset life.**

- State of health monitoring
- End of warranty projections
- On demand battery history dataset
- Battery analytics dashboard
- Alerting – fault and risks
- Asset health reports
- Stress level assessment
- Battery management recommendations
- 24/7 service desk

 Hitachi ZeroCarbon

Analyse battery health and protect long-term vehicle efficiency.

Minimise operational and safety risks through proactive alerts.

Understand battery lifetime and residual value to secure new revenues.
