

ZeroCarbon Charge

Hitachi's premier charge point management system and managed service, delivering optimised management of your electric fleet in a single platform, for reliable fleet operations and lower costs.

A modular solution, **tailored to your needs.**

Monitor all EV and charging operations in one place.

Save on energy costs through advanced smart charging.

Receive reports and daily insights to improve fleet operations.

- Remote charge point management
- Multi-aspect view of EVs and charging operations
- Telematics integration for live vehicle monitoring
- Dynamic load balancing
- Charging session insights
- Power consumption across sites
- Load management
- Tariff optimisation
- Alerting - faults and risks
- B2B charging and EV infrastructure sharing
- Priority charging
- Fleet and energy management systems integration
- Data science reporting on EV operations
- 24/7 service desk
